- ✓ MYSQL & Oracle- ●●●●
- ✓ Data Analytics & Automation Script ●●●●
- ✓ Amazon AWS ●●●●

## PROFESSIONAL EXPERIENCE

### Information System Developer, Department of Computer Science, University of Oxford

24<sup>th</sup> March 2025 – Present

- I collaborate with academic and administrative staff to understand and meet system requirements, advise the IT Manager on deployments, prepare project plans, ensure database and web server continuity, design and test user interfaces, develop complete systems, provide documentation and support, resolve system incidents, update users on changes, seek feedback, build relationships to share best practices, and handle additional duties as needed.

### Tech Lead, Mita.ai (Contractual)

July 2024 – 15<sup>th</sup> March 2025

- As an experienced IT Project Lead and Technology Advisor, I combine technical expertise with strategic insight to drive successful project outcomes and technological advancements. I excel in managing complex IT projects and aligning technology solutions with business objectives to deliver measurable results.

### Principal Consultant, PwC

Oct 2022 – June 2024

- As the project lead for an IT Modernization project at three major private banks, I managed a team of 10 developers and 6 business analysts. My responsibilities included client relations, governance support, and monitoring tasks and schedules (Using PwC's industry proven Framework and methodologies such as "Integrated Project Governance Framework and SPM" It evaluates processes and controls required for successful project delivery).
- As a technical architect, I assessed the client's IT system, proposed a scalable solution, and oversaw its implementation. This resulted in a 40% efficiency increase and a 30% reduction in annual operational costs for a major stock exchange. By implementing a micro-services architecture, we resolved deadlock issues and reduced hardware requirements, leading to significant cost savings.

### First Assistant Vice President, IT - BD Finance

Apr 2022 - Sept 2022

- As head of the IT team, I led nine initiatives, including LOS and eKYC, using Open Source technologies. We optimized our IT infrastructure by balancing local and cloud resources, reducing operational costs by 50%. By decreasing physical servers and shifting processing to the cloud, we cut infrastructure costs and achieved scalable savings.

### Manager, IPDC Finance

Mar 2020 - Mar 2022

- As the team leader for the EZ platform, I led its design, development, and prototype creation. I made key decisions on performance, accountability, deployment, testing, and reporting. I also ensured strong team coordination and created contingency plans to meet our goals

### Software Engineering Senior Analyst, Accenture

July 2012 - Feb 2020

- Enhanced 200+ JAVA VAS Applications to support Docker Env. Develop/Manage Mobile Financial Services (MFS) for GP/ Telenor, Telco App to Bank node integration with Web Service management
- Manage Linux/Windows Server with MySQL & Oracle DB (Userbase of 80 million) [Full Experience portfolio: linkedin.com/in/tanjinahsan](https://linkedin.com/in/tanjinahsan)

## DEVELOPMENT EXPERIENCE

- Developed Hybrid Data structure (Amazon FSx and Layer 3 CloudRouter) based solution for Banks. This system processes data in the cloud, while sensitive information is stored on a local server to comply with regulatory guidelines. The approach minimizes infrastructure costs while ensuring scalability with business growth.
- Worked on 200+ webservices and API integration (Docker Engine API, RESTful, ESB) for telco domain for their payment gateway with 3<sup>rd</sup> party. During the integration full product lifecycle was maintained including Versioning, Deployment, Testing and after deployment issue support (Including attention to root case analysis and mitigation plan).
- Vast experience in understanding client IT architecture with recommendation for modern architecture such as Microservice and Service Bus Layer Design.
- Experience with Mobile Application development including GPS, MFS, Custom Rendering using Open GL ES

## EDUCATION

### BRAC University, Bangladesh

- BSc in Computer Science and Engineering
